

Subj#_____

Which Color Lottery was the best? _____

Which Color Lottery was the worst? _____

In the table below, write how many times you saw a specific color lottery with the given chance of winning. (Give your best guess.)

e.g. if you saw 5 red lotteries with a 50% chance of winning but only 1 blue lottery with a 50%; chance put the number 5 in the box under "50%" and to the right of "Red" & the number 1 under "50%" and to the right of "Blue".

[illegible]

On a scale of 1-10 how often do you think you excepted lotteries with a

0% _____ 10% _____ 20% _____ 30% _____

40% _____ 50% _____ 60% _____ 70% _____

80% _____ 90% _____ 100% _____ chance of winning?

In part 2 you will have one more lottery that you haven't seen before, Yellow. Use your gut to tell how often you think the Yellow lottery would have had the given chances of winning, if you had seen it in Part 1.
